

Scheduling Application

These instructions are for scheduling the ETL tool using Windows Task Scheduler\

1. Open Task Scheduler app in Windows
2. Click on Create Basic in Task Scheduler section on right hand pane

3. Enter Name of Task and provide description in the fields and click Next

4. Choose Daily and click Next, since we need to schedule our task daily

Create Basic Task Wizard ×

 Task Trigger

Create a Basic Task

Trigger

Action

Finish

When do you want the task to start?

☒ Daily

☐ Weekly

☐ Monthly

☐ One time

☐ When the computer starts

☐ When I log on

☐ When a specific event is logged

< Back Next > Cancel

5. Choose the date you want to start task from and time as 9:00:00 AM, since we need to run it at 9 AM every day

Create Basic Task Wizard ×

Create a Basic Task

Trigger

Daily

Action

Finish

Start: 5/13/2021  9:00:00 AM  ☐ Synchronize across time zones

Recur every: 1 days

< Back Next > Cancel

6. Choose option Start a program and click Next

Create Basic Task Wizard

 Action

Create a Basic Task

Trigger
Daily

Action

Finish

What action do you want the task to perform?

☒ Start a program

☐ Send an e-mail (deprecated)

☐ Display a message (deprecated)

< Back Next > Cancel

7. In the '*Program/script*' field enter the path to your python executable (which we can get using the commands in the image that follows and click '*No*'). For '*Start in*' field enter path to our python script that starts the application/ETL Process (i.e.starter.py) and in '*Add arguments*' field enter starter.py and click Next.
